The expression automatic train control, as herein used, is understood to mean, a block signal system in combination with appliances which work in accordance with the signals, and afford complete automatic protection against; - errors in the despatching system, errors of the enginemen, and failures of the signals to operate properly. Summarily, it guards against all errors human or inanimate and permits trains to move only when it is safe for them to do so. The principles of the system only as redesigned for commercial use will be dealt with. These reconstructed plans are the result of...
