Molecular Pathogenesis of Gastrointestinal Infections

By -

Springer. Paperback. Condition: New. 342 pages. Dimensions: 10.0in. x 7.0in. x 0.8in. The meeting that provided the material for this book was the 58th Symposium of the Federation of European Microbiological Societies (FEMS) entitled MOLECULAR PATHOGENESIS OF GASTROINTESTINAL INFECTIONS which was held in Helsingør, Denmark from 2nd to 4th September, 1990. The aim of this meeting was to bring together scientists from a range of disciplines - microbiology, cell biology, molecular biology and immunology - to consider how microbes, including parasites, colonize and infect the gastrointestinal tract. The programme was designed to focus particular attention on the range of strategies whereby enterovirulent bacteria and parasites colonize the gastrointestinal mucin layer, how they adhere to and penetrate the epithelial layer by entering the cells or passing between them, and how various protein toxins may facilitate these processes. Speakers were especially encouraged to highlight the recent expansion in our knowledge of the molecular mechanisms by which enterotoxigenic and enteropathogenic *Escherichia coli*, *Shigella*, *Salmonella* and *Yersinia enterocolitica* cause intestinal disease. There were also discussions of recently-discovered gastrointestinal pathogens such as *Clostridium difficile* and *Helicobacter pylori* as well as accounts of how virulent determinants can be used to develop new diagnostic methods based on DNA gene...

Reviews

This is basically the very best publication I actually have gone through until now. It really is loaded with knowledge and wisdom I realized this publication from my dad and he encouraged this publication to discover.

-- **Bryana Klocko III**

I just started off reading this article pdf. It is probably the most remarkable ebook we have gone through. It is extremely difficult to leave it before concluding, once you begin to read the book.
