Michael O Mara Books Ltd, United Kingdom, 2015. Hardback. Condition: New. Language: English . Brand New Book. Since ancient times, the greatest minds have tried to make sense of the universe by observing objects far beyond our abilities to see or touch - from the smallest atom to the farthest star. Covering, in chronological order, the key discoveries of the most prolific thinkers in each scientific field, including Aristotle, Darwin, da Vinci, Newton, Descartes and Hawking, the book also includes highlights of the most influential scientists lives and works. Learn how Ptolemy fixed his results to match his theories; how Freud used cocaine to expand his thinking; and how Tim Berners-Lee, inventor of the World Wide Web, was banned from using university computers after being caught hacking. Revealing how human curiosity knows no bounds, this book showcases the visionaries who have dared to question established truths and whose theories shaped how we now look at the world.
