University of California Press, United States, 2005. Paperback. Condition: New. New. Language: English . Brand New Book. Heliodinids are tiny, brightly colored dayflying moths. Phylogenetic relationships among genera of Heliodinidae are proposed using parsimony and character compatibility. We describe and illustrate 45 North and Central species (25 newly named) assigned to five genera (two new, two exhumed from synonymy). Larval host plants are recorded for 33 species (14 newly discovered), about 45 of the known fauna; 90 of these are specialists on Caryophyllales, primarily Nyctaginaceae.
