Learning Systems and Intelligent Robots

By -

Springer. Paperback. Book Condition: New. Paperback. 464 pages. Dimensions: 10.0in. x 7.0in. x 1.1in. This book contains the Proceedings of the Second U. S. -Japan Seminar on Learning Control and Intelligent Control. The seminar, held at Gainesville, Florida, from October 22 to 26, 1973, was sponsored by the U. S. -Japan Cooperative Science Program, jointly supported by the National Science Foundation and the Japan Society for the Promotion of Science. The full texts of the twenty-one presented papers are included. The papers cover a variety of topics related to learning control and intelligent control, ranging from pattern recognition to system identification, from learning control to intelligent robots. During the past decade, there has been a considerable increase of interest in problems of machine learning, systems which exhibit learning behavior. In designing a system, if the a priori information required is unknown or incompletely known, one approach is to design a system which is capable of learning the unknown information during its operation. The learned information will then be used to improve the systems performance. This approach has been used in the design of pattern recognition systems, automatic control systems and system identification algorithms. If we naturally extend our goal...
