

## California Red Scale: An Economic Appraisal of an Insect Monitoring Program (Classic Reprint) (Hardback)

By R T Ervin

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from California Red Scale: An Economic Appraisal of an Insect Monitoring Program The key tools of ipm are monitoring and control action thresholds. Monitoring permits the density of pest population within a given area to be estimated. The monitoring results are then assembled into a control action threshold which compares the expected profits to certain levels of pest infestations. With this information, a decision on pest control can be intelligently made. The use of ipm, instead of relying only on scheduled spraying, enables judicious use of chemicals to achieve an acceptable level of profit. The development of insect resistance increases the costs of chemical pesticides to both industry and farmers. Industry incurs added costs from the ever present need to produce new, more effective pesticides. Farmers incur added costs from their attempts to control resistant insects with pesticides that become increasingly ineffective. As taxpayers, farmers also pay for the extra research necessary to overcome insect resistance. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
