The call documentation is the starting point for any questions or investigations concerning the care given by EMTs and paramedics. It is their first line of defense. This book breaks down the components of report giving and writing and provides the reader a useful reporting system to fit just about any written documentation or verbal reporting situation. It also contains helpful chapters on special reporting situations commonly encountered by EMS personnel, and sample reports useful either for discussion groups or individual analysis. Common, proper medical abbreviations and charting symbols drawn from authoritative texts are also provided. The result is a text useful to both new and veteran EMTs and paramedics.
