Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Policy Recommendations on Hiv/Aids Services and Care for Asian and Pacific Islanders: April 1996 Epidemiologic data collected by CDC do not itemize the more than two dozen ethnic populations that comprise the broad api category. This lack of sub-population data greatly reduces the ability of public health planners to develop effective prevention programs and systems of care. The apl population continues to be the fastest growing in the United States. Careful attention should be given both to increases and changes in hiv to increase the likelihood that care systems are used by people living with hiv to meet their hiv and other public health needs.
