EMISSION FACTORS OF CARBONACEOUS PARTICULATE MATTER AND POLYCYCLIC AROMATIC HYDROCARBONS FROM RESIDENTIAL SOLID FUEL COMBUSTIONS (SPRINGER THESES)

Springer. Paperback. Condition: New. 197 pages. Emission inventory is basic for the understanding of environmental behaviors and potential effects of compounds, however, current inventories are often associated with relatively high uncertainties. One important reason is the lack of emission factors (EFs), especially for the residential solid fuel combustion in developing countries. In the present study, emission factors of a group of pollutants including particulate matter, organic carbon, elemental carbon (sometimes known as black carbon) and polycyclic aromatic hydrocarbons were measured...
