RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 50 pages. Original publisher: Ann Arbor, Mich. : U. S. Dept. of Commerce, National Oceanic and Atmospheric Administration, Environmental Research Laboratories, Great Lakes Environmental Research Laboratory, 1998 OCLC Number: (OCoLC)40834053 Subject: Hydrologic models. Excerpt: . . . 4. 3 Comparison to Recorded Lake Levels 4. 3. 1 Model Inputs The ability of MIDLAKES to simulate recorded levels and outflows was tested for the period 1974-1989. This period was chosen because the hydraulic conditions of the middle lakes have been unchanged since 1973. The same stage-discharge relationships (equations 9, 10, and 11) used for the BOC were used by MIDLAKES for this comparison. Net basin supplies were also used for the BOC comparison. Recorded monthly mean values for the Chicago diversion and Welland Canal (Croley and Hunter, 1994) were used in place of the monthly averages used previously. Recorded monthly Lake Superior outflows (Croley and Hunter, 1994) were used here in place of BOC Lake Superior outflows. Since stage-discharge relationships cannot replicate recorded flows exactly, monthly values of weed and ice retardation for each of the three connecting channels were developed so that..
