Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Concreting in Winter Only a few years ago building construction necessitating concrete work was, by common consent, stopped on the approach of cold weather. But many large contracting companies, who have carried on their concrete work uninterruptedly with results as satisfactory as obtained during more favorable weather conditions, have proved that concreting is possible during periods of freezing weather if proper, simple precautions are taken. A knowledge of this has made the subject of concrete construction in winter of general interest to many users of cement; in fact, since it is a slack season many have found winter the best time of year for them to build with concrete. However, successful results depend upon exercising certain additional precautions beyond those that must be observed during other seasons of the year. The object of this publication is to describe methods that should be followed to insure success in concreting carried on during cold weather. Advantages Contractors were probably the first to recognize the advantages resulting from being able to continue concreting without interruption during the winter. Tools and machinery were thus kept employed instead of being idle for three or four months. Overhead expenses and depreciation, being distributed over the cost of a greater volume of work, were considerably reduced. Capable and faithful employees, developed into an efficient organization, were retained for more active service in the spring. With the possibility of carrying on work during the winter, these troubles are largely eliminated. Materials can be promptly delivered because railroads and supply houses are, as a rule, not so rushed during the winter as in the summer when all building operations are active. Another decided advantage...
