Excerpt from Handbook of Poultry and Egg Statistics: August 1933 The first section of the handbook contains 109 tables pertaining to the industry in the United States; the second section contains 9 tables pertaining to the industry in other countries. Data for the United States are classified as farm production and utilization, commercial handling and use, market receipts, cold-storage stocks, imports and exports, prices, standards, conversion factors, and composition. The tables on farm production and utilization include data as to numbers of poultry and egg production in the last several census years, as shown by census returns and by reports to the Division of Crop and Livestock Estimates, and as to production, feed requirements, fattening, dressing, and transportation data, as determined by various surveys. Market-receipts data, given for the important markets, were compiled mainly from reports of the Division of Dairy and Poultry Products and from trade sources. Cold-storage stocks data were compiled from reports of the cold-storage report section of the Bureau of Agricultural Economics.
