## BETWEEN PERCEPTION AND ACTION (PAPERBACK)

Oxford University Press, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book. What mediates between sensory input and motor output? This is probably the most basic question one can ask about the mind. There is stimulation on your retina, something happens in your skull and then your hand reaches out to grab the apple in front of you. What is it that happens in between? What representations make it possible for you to grab this apple? Bence Nanay calls these representations that make it possible for you to grab the apple pragmatic representations . In *Between Perception and Action* he argues that pragmatic representations whose function is to mediate between sensory input and motor output play an immensely important role in our mental life. And they help us to explain why the vast majority of what goes on in our mind is very similar to the simple mental processes of animals. The human mind, like the mind of non-human animals, has been selected for allowing us to perform actions successfully. And the vast majority of our actions, like the actions of non-human animals, could not be performed without perceptual guidance. And what provides the perceptual guidance for performing actions are pragmatic representations. If we accept this framework, many classic questions in philosophy of perception and of action will look very different. The aim of this book is to trace the various consequences of this way of thinking about the mind in a number of branches of philosophy as well as in psychology and cognitive science.
