The Philosophy of Space and Time

By Hans Reichenbach

Dover Publications Inc., United States, 1957. Paperback. Book Condition: New. 204 x 135 mm. Language: English . Brand New Book. An important landmark in the development of the empiricist conception of geometry, this book is still one of the clearest and most valuable expositions of the crisis in physical science and mathematics occasioned by the advent of the non-Euclidean geometries. With unusual depth and clarity, it covers the problem of the foundations of geometry, the theory of time, the theory and consequences of Einstein's relativity including: relations between theory and observations, coordinate definitions, relations between topological and metrical properties of space, the psychological problem of the possibility of a visual intuition of non-Euclidean structures, and many other important topics in modern science and philosophy.

Reviews

The most effective publication i ever go through. It really is written in simple phrases and not hard to understand. I am just easily will get a satisfaction of looking at a written publication.

-- **Ila Pfeffer IV**

This created publication is wonderful. This can be for those who state that there had not been a worth looking at. Your lifestyle period will probably be transform when you comprehensive looking at this book.
