Amphibians of East Africa (Hardback)

By Alan Channing, Kim Howell

Cornell University Press, United States, 2006. Hardback. Condition: New. Language: English . Brand New Book. Published in Cooperation with the Wildlife Conservation Society East Africa is well known for its wealth of plants and animals, represented in game reserves, such as the Serengeti in Tanzania, the Maasai-Mara in Kenya, and the Bwindi Impenetrable Forest Nature Reserve in Uganda. These reserves and others like them have been the localities of wildlife television documentaries that cover the well-known large mammal predators, the crocodiles, the herds of migrating buffalo, and, of course, the gorillas. Less well known, but playing an important role in the East African ecosystems, are the amphibians. The ancestors of the present-day frogs and caecilians were in attendance before the rift valley started to form, and long before the first true mammals shook off the last vestiges of their reptilian ancestry. --from the IntroductionIn the first field guide and reference book about the amphibians of East Africa, Alan Channing and Kim M. Howell provide identification keys and detailed accounts for 194 frog species and 9 caecilians. These descriptions will be of great interest to all herpetological enthusiasts, travelers to the region, and conservation biologists who track the health of amphibian...
