UIDELINES ON CTIVE ONTENT AND OBILE ODE G A C M C Figure 2-1. Basic Components of a Generic Browser To simplify browser development, software designs allow extensibility through a variety of techniques for communicating with other functional components. The motivation is twofold: no one can reasonably build in the means to render all forms of content, and to attempt to do so would limit innovation as well as the usefulness of the browser. As long as the browser design employs or provides a well-defined interface, other software producers can readily extend functionality with their components. In general, the program components of a browser, both built-in and otherwise, can be divided into the classes described below Mor98 . Components incorporated directly within the browser. Browsers contain a significant amount of built-in functionality and typically can inherently render a variety of content types, including text, HTML delimited text, scripting languages, Java applets, and common types...
