

An Introduction to Computers and the Internet - For Children Ages 5 to 8 (Paperback)

By Dennis E Adonis

Createspace Independent Publishing Platform, United States, 2012. Paperback. Condition: New. Large Print. Language: English . Brand New Book ***** Print on Demand *****.This book is the extension of the first edition (Stage one) which had examined the assembly and structural aspects of a computer. In this volume (Stage two), much more emphasis has been placed on computer usage for the purposes of internet browsing. The book which has been ideally designed for children between ages 5 to 8 years, consists of a full colour story-line through which the child would be able to better understand all of the foundation aspects of basic computer and internet usage. This will certainly serve as the stepping stone for the child to effectively apply themselves to the proper use of the internet for academic and socially safe purposes.
