GIS APPLICATIONS FOR WATER, WASTEWATER, AND STORMWATER SYSTEMS

CRC/CBS Publishers & Distributors, 2005. Hardcover. Book Condition: New. Professionals involved in the planning, design, operation, and construction of water, wastewater, and stormwater systems need to understand the productivity-enhancing applications of GIS. Inspired by an ASCE-sponsored continuing education course taught by the author, *GIS Applications for Water, Wastewater, and Stormwater Systems* focuses on the practical aspects of software and data tools that enable GIS applications. The book documents and analyzes effective use of GIS, demonstrating how you can apply the technology to make tasks easier to perform, saving time and money for your organization. The book first describes GIS, detailing its importance and explaining how to avoid potential pitfalls via a needs analysis study. It then describes GIS-related technologies that are crucial in applications development: remote sensing; DEM data; GPS; Internet applications; and mobile GIS. The final ten chapters focus on the "Four Ms" of the water industry: Mapping, Monitoring, Modeling, and Maintenance; applications that define the most important activities for efficient management of water, wastewater, and stormwater systems. Promoting a performance- (or outcome-) based style of learning, each chapter first states learning objectives and later concludes with a chapter summary and questions. The text encourages more effective and natural inductive study by first presenting case studies, then explaining procedures. This volume supplements the text with numerous maps, tables, and illustrations. *GIS Applications Introduction What Are GIS Applications? History of GIS Applications 4M Applications Advantages and Disadvantages of GIS Applications Success Stories Evolving GIS Applications and Trends Future Applications and Trends GIS Application Development Procedure Application Programming Useful Web Sites Needs Analysis Ocean County's Strategic Plan Introduction Needs Analysis Steps Needs Analysis Examples Remote Sensing Applications Albany County's Remote Sensing Application Introduction Remote Sensing Applications Remote Sensing Satellites Spatial Resolution Digital Orthophotos Examples of Remote Sensing Applications Geographic Imaging and Image Processing...*
