

A Treatise on Practical Chemistry and Qualitative Analysis, Adapted for Use in the Laboratories of Colleges and Schools

By Frank Clowes

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 Excerpt: .can often be more simply performed by boiling the solution of the cyanide in a porcelain dish with Am_2S ; which must be added until the yellow colour remains after the liquid has been boiled for a short time. If a dark-coloured precipitate forms, this must be allowed to settle or be filtered off, before the colour of the filtrate can be seen. The liquid is then filtered if necessary, and acidified with HC1 in the porcelain dish. On adding $\text{Fe}_2\text{C16}$ in small quantity, a blood red colour will be produced, which is not removed by heat or by the addition of a little dilute HC1 . The colour is at once destroyed, however, when a few drops of the liquid are added to some HgC12 solution. Methods (304, 305, 306) are exceedingly delicate tests for a cyanide: (305) and (306), if less readily performed than (304), exceed...
