

Beginnings of Cellular Life: Metabolism Recapitulates Biogenesis

Filesize: 3.71 MB

Reviews

It is a single one of the best pdfs. Of course, it can be enjoyed, still an amazing and interesting literature. I discovered this publication from my father and dad encouraged this pdf to be learned.

(Baron Steuber)

BEGINNINGS OF CELLULAR LIFE: METABOLISM RECAPITULATES BIOGENESIS

Yale University Press. Paperback. Condition: New. This item is printed on demand. 208 pages. This book is an extraordinary integration of a lifetime of thought on the subject by an exceptional scholar. Morowitz logically, consistently, and persuasively moves to define arguments that will influence thought in a fundamental realm of biology. -Donald M. Engelman, Yale University Morowitz develops a model of the origin of life in which cells originate first, proteins follow, and genes evolve last. This model contradicts conventional wisdom but has the distinct advantage of being testable; and is supported by evidence mustered from biology, biochemistry, and biophysics. Morowitzs expertise in all three disciplines is impressive. -Francisco J. Ayala, Dept. of Ecology and Evol. Biology, University of California, Irvine In this short and clearly written book, Morowitz explores the origins of life. . . . His objective is elegantly achieved. . . . A stimulating analysis . . . and an excellent read. -A. E. Douglas, Times Higher Education Supplement A book rich in provocative and stimulating ideas. . . . I recommend it to anyone who has ever thought seriously about the origin of life. -Vincent P. Cirillo, Quarterly Review of Biology This item ships from La Vergne, TN. Paperback.
