

Climate Change: Briefings from Southern Africa

Filesize: 5 MB

Reviews

Extensive guide! Its this kind of excellent read through. it absolutely was writtern very perfectly and helpful. Your way of life period is going to be change when you complete reading this ebook.

(Murphy Dooley)

CLIMATE CHANGE: BRIEFINGS FROM SOUTHERN AFRICA

Wits University Press, South Africa, 2016. Paperback. Book Condition: New. 240 x 168 mm. Language: English . Brand New Book. * How do greenhouse gases regulate the Earth s temperature?* How hot will it get?* Will South Africa run out of water?* Isn t climate change just part of a long-term natural cycle?* Do cow-farts really cause global warming?* Is sea-level rise something to worry about?* Will marine fisheries collapse?* Can solar and wind power meet our energy needs?* How can I reduce my carbon footprint?* Is there any chance of runaway global warming? These and many other questions are answered in this full-colour illustrated book. Climate change affects us all, but it can be a confusing business. Three leading South African scientists who have worked on the issue for over two decades help you to make sense of this topic. Climate Change: Briefings from Southern Africa takes the form of 55 frequently-asked questions , each with a brief, clear scientifically up-to-date reply. The authors introduction provides an overview of current national and international policies aimed at regulating climate change. The four main sections take you through the science of how the climate system works, the projected impacts in Southern Africa during the 21st century, what this means for South African society, and what can be done to avoid harm. The profuse illustrations and local examples help to explain complex issues in simple terms. The book is aimed at interested but non-scientist readers, including business people, decision-makers and students, and is very timely in relating to impending international treaties and national efforts to avoid the worst consequences of a changing climate. The year 2015 is regarded as a watershed for global climate change action if a global average temperature rise of more than two degrees above the pre-Industrial level is...
