Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Genetic Evolution | I obtained my master degree of Science in Cell Biology and Histology and particularly in developmental-biology and -physiology field in 2005. During this degree, I mainly worked on developing rat CNS during perinatal period. I subsequently obtained my PhD degree in Embryology and Comparative Anatomy and particularly in developmental-neuroendocrinology and -physiology field in 2009. I studied the interactions between the different states of thyroid hormones and rat brain development during the perinatal period. I gained a remarkable experience in different biochemical, histological/cellular and cell culture techniques in vertebrate brain (rats & chicken). Generally, I published several international papers and books. I also have a strong background in endocrinology and a more specific expertise in thyroidology. Generally, I am member and reviewer in several international societies, organizations and journals. However, my experimental work will not improve accordingly due to the lack of grants to reach the highest objectives. Thus, I am searching for a postdoctoral place, in developmental thyroid-brain axis, to develop my individual skills and enhance my career prospects. | Format: Paperback | Language/Sprache: english | 356 pp.
