

Network Security: Issues, Challenges and Techniques

Filesize: 8.4 MB

Reviews

This sort of book is every little thing and made me searching ahead and more. Sure, it is actually play, nonetheless an amazing and interesting literature. You wont feel monotony at whenever you want of the time (that's what catalogs are for relating to in the event you ask me).

(Gavin Bosco IV)

NETWORK SECURITY: ISSUES, CHALLENGES AND TECHNIQUES

To download **Network Security: Issues, Challenges and Techniques** PDF, make sure you click the link listed below and save the ebook or get access to other information that are have conjunction with NETWORK SECURITY: ISSUES, CHALLENGES AND TECHNIQUES book.

Narosa Publishing House, 2010. Hardcover. Book Condition: New. As the advances in networking technology help to connect any part of the globe, and openness and scalability of the Internet is opening up a number of new on-line applications, the threats from attackers has also grown drastically. In recent years, attackers have shown increasing sophistication in their ability to launch attacks which threaten the security of the devices connected to the Internet. Accordingly, this volume covers - design of an effective Intrusion Detection Systems (IDS), clustering techniques in designing anomaly based IDS, network traffic analysis for security analysis, special properties of Elliptic curves in the context of designing security tools, use of a spatio-temporal logic for checking anomalies in filtering rules as model checking in PSPACE, automated intrusion signatures generation technique, use of sensor fusion in IDS, mechanisms for SPIT prevention, detection mechanism for SQL injection attacks, prevention of unknown malware attack, vulnerabilities in web browsers, security issues in ICMP, reputation systems for online community, copyright protection of digital image, multimedia encryption techniques, attacks and countermeasures in WSNs, WMNs, and P2P networks, key agreement and authentication protocols in UMTS. Table of Contents Foreword / Preface / Acknowledgement / Supersingularity and Cyclicity of Elliptic Curves / High-Speed Network Traffic Analysis: Challenges and Approaches / SSL Automated Signatures / Carving Rule-based Filters within a Spatio-temporal Logic / Unsupervised Anomaly Detection using Incremental Subspace Clustering / Security Attacks and Countermeasures in Wireless Sensor Networks / Detection of Wormhole Attacks in Wireless Mesh Networks / Modified UMTS Authentication and Key Agreement Protocol for Enhanced User Identity Confidentiality / Use of Sensor Fusion in Intrusion Detection System: A Survey / An Effective Detection Mechanism of SQL Injection Attack / Security Issues in ICMPv4 / Vulnerabilities in Web Browsers / SPIT Preventions: A Study on the Existing...
