THERMAL TRANSPORT IN LOW DIMENSIONS

Springer-Verlag Gmbh Apr 2016, 2016. Taschenbuch. Condition: Neu. Neuware - Understanding non-equilibrium properties of classical and quantum many-particle systems is one of the goals of contemporary statistical mechanics. Besides its own interest for the theoretical foundations of irreversible thermodynamics (e.g. of the Fourier's law of heat conduction), this topic is also relevant to develop innovative ideas for nanoscale thermal management with possible future applications to nanotechnologies and effective energetic resources. The first part of the volume (Chapters 1-6) describes the basic models,...
