Phonons and plasmons in ZnO-based alloy and doped ZnO thin films studied by infrared spectroscopic ellipsometry and Raman scattering spectroscopy

By Carsten Bundesmann

Shaker Verlag Jan 2006, 2006. Taschenbuch. Book Condition: Neu. 210x149x12 mm. Neuware - ZnO and ZnO-based semiconductors are of physical and technological interest und currently focus of intensive research activities. The reason for the renewed interest is that ZnO-based materials are potential candidates for UV-optoelectronic (light emitting diodes, laser diodes, detectors) or spintronic devices (spin transistors or magnetic memory devices). Essential for the performance of the above addressed materials is the knowledge of fundamental properties concerning the incorporation of the alloying and doping elements. The focus of the present work is the comprehensive study of lattice (phonon) and free charge carrier (plasmon) properties of ZnO-based alloy and doped ZnO thin films, and subsequent evaluation of strain, composition, and dopant influence. The experiments are done by combination of infrared spectroscopic ellipsometry (IRSE) and Raman scattering spectroscopy. The objects of the investigations are single-crystalline (Mg, Cd, Mn, Fe, Co, Ni, Cu)ZnO-alloy and (N, Li, P, Sb, Ga, Al)-doped ZnO thin films grown by pulsed laser deposition (PLD) on sapphire substrates. For comparison, polycrystalline ZnO thin films on silicon, glass, and polyimide foil, and commercially available ZnO bulk single crystals are studied. Starting from undoped ZnO thin films and ZnO bulk single crystals,...

Reviews

A whole new electronic book with an all new perspective. It is one of the most incredible book we have read. Your way of life span will likely be convert when you comprehensive reading this article book.

-- **Spencer Fay**

This pdf is worth buying. It is actually writter in basic words and not confusing. Its been printed in an remarkably basic way in fact it is merely following i finished reading this publication through which really altered me, affect the way i really believe.
