Wilfrid Laurier University Press. Paperback. Condition: New. 394 pages. Dimensions: 8.9in. x 6.0in. x 0.9in. Map Worlds plots a journey of discovery through the world of women map-makers from the golden age of cartography in the sixteenth-century Low Countries to tactile maps in contemporary Brazil. Author Will C. van den Hoonaard examines the history of women in the profession, sets out the situation of women in technical fields and cartography-related organizations, and outlines the challenges they face in their careers. Map Worlds explores women as colourists in early times, describes the major houses of cartographic production, and delves into the economic function of intermarriages among cartographic houses and families. It relates how in later centuries, working from the margins, women produced maps to record painful tribal memories or sought to remedy social injustices. Much later, one woman so changed the way we think about continents that the shift has been likened to the Copernican revolution. Other women created order and wonder about the lunar landscape, and still others turned the art and science of making maps inside out, exposing the hidden, unconscious, and subliminal text of maps. Shared by all these map-makers are themes of social justice and making maps work for the betterment of humanity. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
