Reviews

Complete guideline! Its such a excellent read. This really is for all who statte there had not been a worth studying. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Timothy Lynch)

LAND-UND GARTEN-SCHATZ (6)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 82 pages. OCLC Number: (OCoLC)173666012 Subject: Water -- Pollution -- United States. Excerpt: . . . 2. Study Area The geographic extent of the REMAP study area is 7, 418, 000 acres (20. 6 of Wisconsin total land area), and encompasses the Western Coulee and Ridges and the Southwest Savanna ecoregions in western Wisconsin (Figure 1), which are based on the United States Department of Agriculture - Forest Services National Hierarchical Framework of Ecological Units (Keys et al. 1995). These ecological units closely approximate Omerniks Level III Driftless Area Ecoregion (Omernik 1987) and are collectively referred to as the Driftless Area in this report. The Driftless Area extends into the states of Minnesota, Iowa, and Illinois, and remained unglaciated during the most recent glacial period, whereas the rest of Wisconsin and most of the upper Midwest was covered with ice. As a result, the Driftless Area has a mature drainage system characterized by deeply incised valleys and few natural lakes or wetlands relative to the rest of Wisconsin. The relatively steep topography creates a significant water flow gradient and valley bottoms are close to the water table, resulting in streams with high baseflow that are dominated by coldwater fish assemblages. The soils of the Driftless Area are well-drained silty loess over dolomite, limestone, or sandstone. Land use patterns closely follow spatial differences in slope, with field corn, soybean, alfalfa, and pastureland situated on the ridge tops and in the valley bottoms, and hardwood forests dominate the steeply sloped valley sides. The Driftless Area was selected for the REMAP study area because the amount of topographic relief in this area provides clearly delineated watersheds, and land use (and presumably stream...
