Motorbooks International, United States, 2018. Paperback. Condition: New. New Edition, paperback reissue. Language: English . Brand New Book. Area 51 s most important military aviation developments are profiled in an illustrated format. When most of us think of Area 51, we think of aliens, UFOs, and controversial government cover-ups. It s easy to forget that, since the mid-1950s, the United States famed extension of Edwards Air Force Base has served as a top-secret CIA testing ground for many of the most groundbreaking advancements in American military aviation technology. In Area 51 - Black Jets, author and military historian Bill Yenne offers the first fully illustrated chronology of Area 51 s most famous aircraft projects, including Lockheed s U-2 Dragon Lady and SR-71 Blackbird reconnaissance planes, drones ranging from the early Lockheed D-21 to the modern-day General Atomics MQ-1 Predator, and the famous F-117 Nighthawk stealth fighter produced by the Have Blue program during the 1970s. Each project is given its own fascinating chapter illuminating the aircraft s development at this famed location. But beyond the aircraft themselves, Area 51 - Black Jets also covers a handful of the many classified experimental programs carried out at Area 51 over the years, such as Have Doughnut, Have Ferry, and Have Drill - secret undertakings that successfully reverse-engineered such enemy aircraft as the Russian MiG during the Cold War. Presented in beautiful hardcover format and illustrated with historic color and black-and-white photographs, diagrams, and maps, this book reveals Area 51 for what it truly is: a clandestine area for the United States most cutting-edge technological innovators in military aviation.
