Hence, the numbers are 6 and 10. Remark.--This is properly a pure equation of the third degree; but questions producing such equations are generally arranged with those of the second degree. 17. A money safe contains a certain number of drawers. In each drawer there are as many divisions as there are drawers, and in each division there are four times as many dollars as there are drawers. The whole sum in the safe is \$5324; what is the number of drawers 1 Ans. 11. 19. Two travelers, A and B, set out to meet each other; A leaving the town C at the same time that B left D. They traveled the direct road from C to D, and on meeting it appeared that A had traveled 18 miles more than B; and that A could have gone B's journey...
