

C-Test Construct Validation

By Baghaei, Purya

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | A Rasch Modeling Approach | C-Test is an economical test of general language proficiency in the first and second language. Ease of construction and scoring coupled with its cost-effectiveness have made C-Test a useful instrument for institutions which need a quick placement instrument and second language researchers who need a measure of learners' general language proficiency. The present book addresses C-Test construct validity by using the latest developments in modern measurement theory. Probing into the dimensionality of C-Test is the main focus of the book. Rasch modeling is used to study different aspects of C-Test construct and to clarify the dimensionality issue. In this endeavor exploratory factor analysis, Rasch rating scale model, differential person and item functioning (DIF/DPF), principle component analysis of residuals (PCAR) and item and person measures invariance are used. The results should help C-Test users make informed decisions when embarking on using C-Test for their next testing project. It should also be useful to language testing researchers who want to investigate some ripe areas of research in C-Test. | Format: Paperback | Language/Sprache: english | 342 gr | 248 pp.
