FATIGUE BEHAVIOR OF A SiC/SiC COMPOSITE AT 1000°C IN AIR AND STEAM

Biblioscholar Okt 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x10 mm. This item is printed on demand - Print on Demand Neuware - Tension-tension fatigue behavior of a prototype Silicon Carbide/Silicon Carbide (SiC/SiC) ceramic matrix composite (CMC) material was investigated at 1000°C in laboratory air and in steam environments. The material consists of a SiC matrix reinforced with CG NICALON(TM) fibers woven in an eight harness satin weave (8HSW) and coated with a BN/SiC dual-layer interphase. The composite was manufactured by...

This publication may be worth purchasing. I am quite late in start reading this one, but better than never. It is extremely difficult to leave it before concluding, once you begin to read the book.
