LASER PHOTODISSOCIATION AND SPECTROSCOPY OF MASS-SEPARATED BIOMOLECULAR IONS

Springer International Publishing AG. Hardcover. Condition: New. 119 pages. Dimensions: 9.2in. x 6.4in. x 0.5in. This lecture notesbook presents how enhanced structural information of biomolecular ions can be obtained from interaction with photons of specific frequency - laser light. The methods described in the book Laser photodissociation and spectroscopy of mass-separated biomolecular ions make use of the fact that the discrete energy and fast time scale of photoexcitation can provide more control in ion activation. This activation is the crucial process producing structure-informative...
