Reviews

The ebook is great and fantastic. We have read and i also am sure that i am going to likely to go through once again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Createspace, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Just over three years ago a tourist on Ireland s Aran Islands videoed two apparently trendy teenage boys and a weird shock haired animal vanishing into empty space. The video went viral and at the time the boys were humorously depicted as Leprechauns. It was dismissed as a clever fake. Subsequent examination proved conclusively that this video was 100 genuine and the highly magnetised young people and what turned out to be a cat with magnetically bushed fur actually did vanish into empty space! The inevitable conclusion was that someone, somewhere had developed the ability to move living entities from one place to another by using molecular dispersal matter transport technology. The fact that this information was in the hands of private individuals worried and incensed governments who apart from craving the technology for themselves were concerned that it could be misused if in the wrong hands. which was exactly what happened! A series of events took place which left our planet racing towards a direct course to self destruction. One ordinary man held the key. Could he turn it in the right direction to save our beautiful world though?.
