INFLUENCE OF PROCESS PARAMETERS ON FUNCTIONAL PROPERTIES OF SLURRY DERIVED PFSA MEMBRANES

Shaker Verlag Mai 2013, 2013. Taschenbuch. Condition: Neu. Neuware - The processing of perfluorosulfonic acid (PFSA) ionomer membranes derived from polymer slurry is the focus of this study. PFSA molecules self-aggregate and form micelles in a slurry as a consequence of its chemical structure. The gradual coalescence of polymer micelles occurs upon membrane formation processes. The particular application of PFSA membranes is proton conducting solid electrolyte for fuel cells, which operate at high temperatures up to 120°C and low relative...

Reviews

This publication might be well worth a study, and much better than other. It is among the most awesome book i have got study. You may like the way the article writer publish this publication.

-- **Dr. Paige Bartell**

This type of publication is every thing and taught me to searching ahead and more. It can be rally fascinating through reading through period of time. You can expect to like how the blogger write this pdf.

-- **Dr. Jillian Champlin IV**

It in a of my personal favorite book. It really is filled with wisdom and knowledge Your daily life period will likely be enhance the instant you total looking at this pdf.
