Reviews

These kinds of publication is everything and made me hunting ahead of time and more. I have got read through and i also am confident that i am going to gonna study yet again yet again later on. Its been printed in an extremely basic way in fact it is only after i finished reading this pdf in which in fact transformed me, alter the way i believe.

RUBBER MANUFACTURE; THE CULTIVATION, CHEMISTRY, TESTING, AND MANUFACTURE OF RUBBER, WITH SECTIONS ON RECLAMATION OF RUBBER AND THE MANUFACTURE OF RUBBER SUBSTITUTES

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: .and a little steam are blowing through the vats. White lead results which is washed from the unaltered lead. The water of hydration which may be present in white lead often causes blowing. It has a specific gravity of 6.1 to 6.2. Sublimed white lead is not what the name implies, a carbonate of lead, but is a basic sulphate. Its use is increasing in favor as it does not tend to produce blowing. It accelerates more than white lead, and produces a black product when vulcanized. It is a velvety powder and mixes readily with the rubber. It has a slightly higher density than white lead. Red lead, or minium, is the tetroxide of lead, or really it may be thought of as a mixture of lead monoxide and dioxide. $2 \text{PbO} \rightarrow \text{PbO}_2$ (Red Lead) It is made by heating litharge in a reverbratory furnace at a temperature of 450 deg. C., but must not be allowed to melt. The best grade is made by heating the monoxide of lead with sodium nitrate in an oxidizing flame to a dark red heat. It has a specific gravity of 8.6 to 9. It is one of the most powerful inorganic accelerators, perhaps due to the heat of reaction between it and the sulphur. It is used in rapid curing stocks. It can be used only within certain limits as it will attack the rubber as a result of its strong oxidizing power....
