## Mentation: On a Wave of Computation

By Noah Horwitz

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 258 pages. Dimensions: 9.0in. x 6.0in. x 0.7in. Mentation is ostensibly an attempt to synthesize the best current theory we have about consciousness (Hameroff and Penroses Orch OR theory), about the mind (the computational theory of the mind in particular as articulated by Jerry Fodor), and about the fundamental nature of the brain (Karl Pribrams holonomic theory) into a single philosophy of mind. As part of this synthesis, this text advocates that the very neural correlate of consciousness has been discovered (and notes the consequences) and that fundamentally the mind makes use of, what the author calls, wave form computation. Various aspects of the mind such as memory, dreams, the unity of consciousness, free will, etc. are reinterpreted in the light of the wave form computation that forms the basis of the mind. In doing so, competing theories of consciousness and mind such as the information-theoretic theory, higher-order theory, Ned Blocks theory, Daniel Dennetts, and Jesse Prinz amongst others are critically evaluated. A full computational approach is developed in order to analyze the cyborgs being built today, the purpose of consciousness, our relation to the divine, and other topics....
