

Introduction to Greenwich Astronomical Observations

Filesize: 5.78 MB

Reviews

The ebook is easy in read through easier to fully grasp. It is rally fascinating throgh reading through time. I am effortlessly can get a enjoyment of reading a written publication.

(Kiarra Schultz III)

INTRODUCTION TO GREENWICH ASTRONOMICAL OBSERVATIONS

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: .circle joining the cusps makes with the meridian; δ , the Sun's declination, and δ_m the Moon's declination as seen at Greenwich: P the Sun's hour angle at the Moon's Transit: then $\tan \theta = \operatorname{Cosec} P \cdot \cos \delta_m \cdot \tan \delta - \cot P \cdot \sin \delta_m$; and the correction to be applied to the Geocentric N.P.D. will be Moon's geocentric semidiameter $\times \operatorname{versin} \theta$. For Mercury and Venus, when horned, the investigation of the correction for defective illumination assumes the same form as for the Moon. If the Moon be gibbous, as is the case in the greater number of instances, draw a great circle through the centre of the Moon, at right angles to the meridian passing through the Moon, and let it meet the meridian passing through the Sun; then the intersection of this circle with the Sun's meridian will determine the place of a fictitious Sun, which would equally illuminate both limbs of the Moon when on the meridian; and the elevation or depression of the true Sun above or below the great circle joining the Moon and fictitious Sun, measured in a plane at right angles to that circle, will represent the angle by which the lowest or highest part of the illuminated hemisphere is distant from the limb, and therefore the angle whose versed sine multiplied into the Moon's semidiameter is the correction required. Let then P be the North Pole of the heavens, M the...
