

The Larvae of Indo-Pacific Coastal Fishes: An Identification Guide to Marine Fish Larvae (Hardback)

Filesize: 6.18 MB

Reviews

An extremely awesome pdf with perfect and lucid reasons. I have got to go through and so i am certain that i will going to read again once again in the foreseeable future. I found out this ebook from my dad and i recommended this publication to understand.

Brill, Netherlands, 2000. Hardback. Book Condition: New. 236 x 170 mm. Language: English . Brand New Book. The second volume in the Fauna Malesiana book series gives an extensive overview of the larval development of 124 families of fishes, many of them of importance for both fishery and from ecological perspectives. The families that are described originate from the center of global marine biodiversity: the tropical Indo-Pacific Oceans, a region rich in coral reefs, as well as mangrove, estuarine, and coastal shelf habitats. The identification guide not only documents the ontogeny of these fishes but also provides the means to identify these extraordinarily diverse larvae to the level of family. The book offers a wealth of instructive and detailed figures and illustrations (219 plates, each consisting of approximately 4 figures) for enabling the identification of these families and their larval specialization.
