Some mountains are big and others are small. Did you know planet earth is full of mountains? Many animals live on mountains and many people love to hike them just for fun or adventure. How about you? How do you feel about mountains? If someone asked you what is a mountain what would you say? The dictionary defines a mountain as "a large natural elevation of the earth s surface rising abruptly from the surrounding level; a large steep hill." Does that sound too complicated? Lets try another way. Let say a mountain comes up from the ground and is higher than everything else around it. They are not hills because they are bigger than hills. And mountains dont like to be alone. They like to be with other mountains! How can we tell a mountain and hill apart? The difference is the height. A mountain has to rise more than 1,000 feet above the things around it to be called a mountain. Mountains come from different places and one of them is tectonic plates. In our book Beautiful Volcanoes, we talked about these plates. "If you dig all the way inside the earth, you will find something that looks like a giant puzzle with lots of different parts. The parts we want to discover are called: "tectonic...
