THE ELEMENTS OF CHEMICAL ENGINEERING (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Elements of Chemical Engineering One Of the commonest appliances used in the laboratory is the beaker, made of glass or porcelain, and it will be instructive to follow its evolution in working on a large scale. Ordinary laboratory beakers are made in different sizes to hold any quantity from an Ounce or less to half a gallon or more. They are applied for different purposes: for storing or mixing liquors for dissolving solids in liquids, either in the cold or by heat; and in some cases, though not often, for boiling down, concentrating, and crystallising. For the latter purposes porcelain basins are preferred. As the uses of both beakers and basins are almost identical, we may, where convenient, include the evolution Of the basin in that of the beaker.
