MARKOV CHAIN MODELS FOR STOCHASTIC SHORTEST PATH PROBLEM

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The Markov stochastic process is used to model lots of optimization problems, especially in the network optimization problems. In the routing optimization problems there could be either continuous or discrete parameters in the networks. Suppose the length of an arc is defined as the time that takes to transmit flow between the pair linked nodes of the arc; then, in this situation the cost parameters of the network are continuous variables and...
