EHSNA22. UA1. the UA2. UA5. TASSO experiments institutions the subsets dynamical symmetry and nonlinear quantum field joint of partial differential equations. and a combination of both. the approximate analytical solution with a fundamental solution. N-point truncated Green functions) which are summarized . whereby the interpretation of a number of expressions fit the experimental data. in particular. performance of the probability density and quality produced in the hadron strong interaction and weak interactions relationship; on this basis. combined with experimental data and theory itself. The principle of interacting quantum field improved and supplemented. Strongly interacting quantum field principle. expression and their relationship portrayed built in Schwartz distribution. generalized functions basis point set topology and measure dimension theory. Senior undergraduate students. graduate students. and teachers engaged in teaching and research and researchers strongly interacting quantum field principle available for nuclear physics. particle physics. and other related professional reference reading. Contents Preface Chapter 1 N-hadron hadron quantum field theory of the formation of the strong interaction field quantum quality 1.1 scale multiple number N scale distribution and field quantum quality 1.2 hadron momentum distribution 1.2.1 Asian gold For 1.2.2 statistical scale energy and momentum distribution the structure complex speech nature of phenomenological method 1.3 N-hadron stories 1.4 N-hadron momentum probability density distribution: theoretical requirements of Chapter 2. N-hadrons produced...
