

Excel 2007 VBA Programmers Reference

By John Green

Wiley Publishing. Paperback. Book Condition: New. Paperback. 1176 pages. This book is aimed squarely at Excel users who want to harness the power of the VBA language in their Excel applications. At all times, the VBA language is presented in the context of Excel, not just as a general application programming language. The book is loosely divided into three sections: Primer (Chapter 1) Working with Specific Objects (Chapters 2-27) Object Model References (Appendices A-C) The Primer has been written for those who are new to VBA programming and the Excel object model. It introduces the VBA language and the features of the language that are common to all VBA applications. It explains the relationship between collections, objects, properties, methods, and events and shows how to relate these concepts to Excel through its object model. It also shows how to use the Visual Basic Editor and its multitude of tools, including how to obtain help. The middle section of the book takes the key objects in Excel and shows, through many practical examples, how to go about working with those objects. The techniques presented have been developed through the exchange of ideas of many talented Excel VBA programmers over many years...
