Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Use of Alcohol in Internal Combustion Engines: Thesis for the Degree of Mechanical Engineer in the Graduate School of the University of Illinois, Presented June, 1906 The reports of the United States Geological Survey all lend strength to the belief that the supply of petroleum is fast becoming exhausted. The surveys show that while the oil fields are widely distributed, they are very limited in extent. The average percentage of gasoline in petroleum from all the oil fields in the world is less than two per cent. This fact, taken in connection with the constantly increasing demand and failing supply, makes it necessary to find a fuel that has unlimited possibilities of production. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
