Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from College Algebra This work originated in the author's desire for a course in Algebra suited to the needs of his own pupils. The increasing claims of new sciences to a place in the college curriculum render necessary a careful selection of matter and the most direct methods in the old. The author's aim has been to present each subject as concisely as a clear and rigorous treatment would allow. The First Part embraces an outline of those fundamental principles of the science that are usually required for admission to a college or scientific school. The subjects of Equivalent Equations and Equivalent Systems of Equations are presented more fully than others. Until these subjects are more scientifically understood by the average student, it will be found profitable to review at least this portion of the First Part. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
