

Fantastic Voyage: Live Long Enough to Live For Ever

By Grossman, Terry. Kurzweil, Ray.

Rodale. 1 Cloth(s), 2004. hard. Book Condition: New. Immortality is within our grasp, argues inventor and futurist Ray Kurzweil, who posits that we are in the early stages of several profound revolutions in human ability, spawned by advances in biology, information science, and nanotechnology, even as other new life-extending methodologies are emerging. With Terry Grossman, a specialist in anti-ageing medicine, Kurzweil charts the progress that has been made and points the way to what is to come, from the self-evidently sensible (take plenty of exercise) to the truly mind-boggling (reduce biological ageing by the injection of nanobots). "This visionary book provides a state-of-the-art synthesis of the latest evidence on aging." Dean Ornish 451.
