Reviews

Undoubtedly, this is the greatest operate by any article writer. It is actually witter in straightforward words instead of confusing. Your life period is going to be change as soon as you complete looking over this book.
(Karina Ebert)

PRESERVING AT HOME: A BOOK FOR THE HOME ECONOMIST (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Preserving at Home: A Book for the Home Economist In the preservation of fruit the most essential thing is to keep the fruit, as well as the utensils used, sterile. This should be observed from the earliest stage in the preparation Of the fruit to the final sealing and storing. To sterilize a substance or thing is to destroy all life and source of life in it. It is necessary to do more than exclude the air, for investigations of scientists, particularly Pasteur, have shown that it is not the oxygen of the air which causes fermentation, but bacteria and other microscopic organisms. Yeast and nearly all kinds of bacteria require oxygen, but certain species grow equally well without it, so that the exclusion of air is no protection if one Of these bacteria is sealed in the can. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
