CELL BIOMATERIAL INTERACTION

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | A Study on Emerging Materials for Neural Implants | A key issue in the development of chronic implantable devices is the study of appropriate material surfaces. The book addresses the interactions of materials with the central nervous system cells. Among different aspects of interactions cell adhesion, selective growth and network formation have been studied elaborately. Surface engineering at the micro and nano-scale is an extensive research tool used for modulating cell-material interaction..
