A design which seems to be the trapezoids superimposed is called LekyuwineL, they come together. The conception of the design seems to be that of the second variety of triangles back to back. A series of rectangular parallelograms superimposed so that each higher one projects to the right of the one below it, the whole being bordered by a double line conforming to the outline, is called qowitselminat, worm goes round, or worm s stairway. The oblique-angled parallelograms in pairs with the upper one projecting to the right is the design most frequently found on the hats (Pl. 25, Fig. 5). They are found in series on the storage baskets, djel5. Usually even numbers are employed, preserving the symmetry of the zone. This figure appears the same either side up. This design and others presenting a mass of color usually have that mass broken in some way. Designs in red often have horizontal lines in black. Oblique lines in white often run across the design. When such lines run through the oblique-angled parallelograms (Pl. 25, Fig. 5) they are called niLkutdasaan mikiteweso, one-on-the-other its scratches. Instead of straight lines, broken lines and series of geometrical figures are often employed. The lines are often run in such a manner as to divide The baskets designs here given are not all of those used by the Hupa. Dr. A. L. Kroeber has in preparation a paper on the basket patterns of...
