These anlagen (5) are also shown in section (fig. 33) in which it is seen that they arise contiguous to the precardinal vein (6). The question concerning the method by means of which connections are established between the independent anlagen of the lateral pharyngeal lymphatic, and between the lymphatics and the veins, is of secondary consideration at present and will be fully considered further on (Section XIII, p. 57). The main question at issue is whether or not such independent endotheliallined anlagen actually exist. If they do exist, the contention that lymphatic endothelium is specific, in the sense that it is invariably derived from...
